PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

---

PROJECT NUMBER:	8915	SESSION NUMBER:	01
DATE OF SESSION:	12 JUN 89	DATE OF REPORT:	12 JUN 89
START:	0922	END:	1018
METHODOLOGY:	CRV	VIEWER ID:	011

---

1. (S/NF/SK) MISSION: To determine and describe the key functions and supporting activities of a target consisting of structures represented in overhead photography.
2. (S/NF/SK) VIEWER TASKING: "Reaccess the target and describe its key function and supporting activities."
3. (S/NF/SK) COMMENTS:
  - a. Inclemencies: None reported.
  - b. Physical descriptions of the site indicated that 011 had successfully reaccessed it. 011 gave indications of "bouncing" on and off target throughout the last part of the session, but was aware of the problem and was quick to distinguish AOL from signal.
  - c. Summary of Information enclosed.
4. EVALUATION:
5. SEARCH EVALUATION: N/A

3 encl: Viewer's summary

## SUMMARY OF INFORMATION

THE TARGET APPEARS TO BE A STRUCTURE OR GROUP OF STRUCTURES THAT FORM A COMPLEX. SOMETHING LIQUID IS IMPORTANT TO, AND CONTAINED WITHIN THE STRUCTURE/S. THE AVAILABILITY OF ABUNDANT WATER IS VERY IMPORTANT TO THE FUNCTION OF THIS COMPLEX. WITHIN THIS COMPLEX, LIQUID IS FLOWING, SWIRLING, AND COOLING. IN SOME CASES IT IS UNDER PRESSURE IN PIPES AND TANKS. IN OTHER CASES THE LIQUID IS AT REST IN CONTAINMENT PONDS AND WELL-LIKE CISTERNS.

THERE IS A PERSON INSIDE ONE OF THE STRUCTURES. HE IS WEARING A TAN LAB-COAT, A HARD HAT, AND IS WRITING FIGURES ON A CLIPBOARD. HE APPEARS TO BE COPYING READINGS FROM GAUGES.

THE LIQUID CIRCULATING THROUGHOUT THIS FACILITY SEEMS TO BE IN VARIOUS STAGES OF REFINEMENT. SOME OF IT IS THIN AND CLEAR,

WORKING PAPER

SOME IS THICK, STICKY AND AMBER IN COLOR. I AM NOT PICKING  
UP ON ANY STRONG CHEMICAL ODORS, ONLY A SLIGHT NUTTY  
AROMA.

(AOL - A CHEMICAL PLANT)

AOL break/5  
like chemical plant  
in Libya

hard

square  
tall  
rectangular  
angular

4 1/2 - a structure/structures located in a hot, dry climate - large, tall angular buildings whose purpose is to move/alter some kind of liquid. There are many pipes, containment tanks and holding tanks.

People

4 1/2 - people with hard-hats, lab-type coats, clipboards, writing - I.D. badge on left pocket - lab coat is tan/khaki color, - writing down readings off of gauges, etc.

LIQUID?

• viscous  
thick  
yellowish  
amber

chemical-like

4 1/2 - some kind of chemical-like liquids - various stages of refinement - some liquids are thin and runny <sup>and more clear</sup> - there are thicker and somewhat amber in color - almost oily to the touch, slippery, sticky - not picking up on any strong odor - maybe a slight nutty odor.

4 1/2 - getting the impression that this complex is here because of the available source of water in an otherwise arid region

from ancient times this location has been important because of the availability of water. And that holds true in the present \_\_\_\_\_
